- November 18, 2013: Third CAG Meeting held – EPA Participated;

- December 16, 2013: Fourth CAG Meeting held – EPA Participated;

Throughout the history of EPA's presence at the West Lake Landfill Superfund Site, there have been ongoing EPA internal meetings; dialogues with federal, state, and local elected officials; phone calls and one-on-one meetings with community members, health officials, other federal agencies, and city/county representatives.

Actions that support EPA's role at the site have been conducted, and communicated with the public at large consistently. Some of these actions include: groundwater and soil sampling; the ASPECT flyover; and air modeling.

Some of the entities EPA has partnered with to gauge and achieve environmental results include: USGS, ORD, ATSDR, MDNR, MDHSS, the St. Louis County Health Department and academia (Harvard, SLU, and Washington U.)

EPA has responded to numerous public, press, and congressional inquiries over the tenure of this site. Announcements conveying sampling data, public meetings, outreach/media events, and other EPA-related meetings/sessions, have been publicized through fact sheets, newspaper ads, telephone calls, EPA's website, EPA's Community Involvement Plan, and one-on-one interviews with community members.
